SUMMARY

Technical Lead with over 11 years in backend engineering and system architecture, now leading release management and developer experience at Deel. Track record across Fintech, HR tech and E-Commerce, in both startups and enterprises. Focused on scalable microservices, cloud platforms, reliable delivery pipelines and internal tooling that lets engineering organizations ship faster with fewer incidents.

EXPERIENCE

TECHNICAL LEAD, *Deel*
09/2025 – Present
Berlin, Germany

- Lead the Release Management team, owning release management and developer experience from a people, process and operational perspective.
- Drive the internal release tooling platform: Release Control Center, Migrations Control Center, Cherry-pick Bot and Dev-Toolkit.
- Authored the Migrations Control Center technical design (NestJS with hexagonal architecture, Next.js, Nx monorepo) to make database migrations visible and controllable across releases.
- Run postmortems for release incidents and turn findings into process and tooling changes that improve release reliability.
- Coordinate cross-functionally with product engineering teams to improve delivery efficiency and organizational execution.

SENIOR BACKEND ENGINEER, *Enpal*
02/2025 – 08/2025
Berlin, Germany

- Delivered scalable, event-driven services using .NET, MongoDB and Azure.
- Built critical features with a focus on maintainability and performance.

FREELANCE BACKEND ENGINEER *(Contract)*
09/2024 – 02/2025
Remote

- Led architecture and delivery of internal tools and data pipelines for early-stage startups.
- Delivered all projects as scoped.

STAFF ENGINEER, *Join Solutions*
02/2024 – 09/2024
Berlin, Germany

- Refactored application processing logic and introduced permission-based access, increasing application volume by 15%.
- Delivered a scalable microservices architecture using gRPC, Docker and Kubernetes, boosting system performance by 25%.
- Mentored engineers, enforced code review policies and drove a 20% improvement in code quality.
- Led cross-functional releases with a 95% on-time delivery rate.
- Optimized database access for critical queries, achieving up to 1000x performance gains.

SENIOR BACKEND SOFTWARE ENGINEER, *Join Solutions*
12/2022 – 01/2024
Berlin, Germany

- Developed scalable backend services primarily in TypeScript, improving reliability and performance across multiple projects.
- Designed and implemented gRPC APIs between backend systems, improving inter-service communication efficiency by 50%.
- Optimized critical database operations, achieving up to 1000x faster query execution.

SENIOR SOFTWARE ENGINEER, *Pixsy*
09/2021 – 12/2022
Berlin, Germany

- Developed image comparison algorithms, significantly improving image match accuracy.
- Automated data analysis workflows, reducing manual overhead by 50%.
- Established a testing culture, cutting production bugs by 60%.

BACKEND TECHNICAL LEAD, *Sonect* 03/2020 – 08/2021
Zurich, Switzerland

- Delivered a white-label fintech solution for BNL and led the migration to microservices.
- Migrated infrastructure to bare metal for performance and cost gains.
- Integrated with EU financial systems and promoted high code quality standards.

BACKEND TECHNICAL LEAD, *BillBeez* 05/2019 – 03/2020
Kyiv, Ukraine

- Launched a new fintech platform on scalable Node.js and MySQL microservices.
- Designed secure RESTful APIs and performance-tuned backend processes.

FULLSTACK SOFTWARE ENGINEER, *Thomas Cook* 10/2017 – 05/2019
Kyiv, Ukraine

- Developed web applications with Angular and React in JavaScript and TypeScript.
- Designed and implemented RESTful APIs using Node.js and Express on MySQL and MongoDB.

SOFTWARE ENGINEER, *Eze.tech (consulting, short contract)* 08/2017 – 10/2017
Kyiv, Ukraine

- Developed backend systems and RESTful APIs (Node.js, Express) for a ticket reselling e-commerce platform.

SOFTWARE ENGINEER, *Intersog* 04/2017 – 08/2017
Kyiv, Ukraine

- Built GDPR-aligned personal data search for the Prefender project, optimizing search algorithms and data storage.

SOFTWARE ENGINEER, *Leantegra* 01/2016 – 04/2017
Kyiv, Ukraine

- Migrated the CVO portal from Angular 1.5 to React and built a real-time location service and analytics platform.
- Full-stack development with Node.js, Express, Sequelize, MySQL, PostgreSQL and MongoDB, plus data visualization with NVD3.

SKILLS

Languages: TypeScript/JavaScript (Node.js), Go, C#/.NET, SQL, Bash

Frameworks: NestJS, Express, Fastify, Next.js, Nx

APIs: REST, gRPC, GraphQL, WebSockets, event-driven architecture

Data: PostgreSQL, MySQL, MongoDB, query optimization, PL/pgSQL

Cloud & infra: AWS, GCP, Azure, Docker, Kubernetes, Terraform, Pulumi

Messaging: Kafka, RabbitMQ

Delivery: release management, CI/CD, migrations, incident postmortems

Quality & security: Jest, Mocha, integration testing, OWASP, JWT, OAuth

EDUCATION

B.S. Computer Science, National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute" 09/2017 – 06/2021

M.Fin. Finance, Kyiv National Economic University 09/2004 – 06/2009
