OBJECTIVE

Experienced Staff Engineer/Technical Lead with over 11 years in backend development and system architecture. Demonstrated success in E-Commerce, Fintech, and HR tech environments across both startups and enterprises. Focused on developing scalable microservices, leveraging cloud platforms, and enhancing high-performance systems to drive significant product impact.

EXPERIENCE

Technical Lead, *Deel* 09/2025 – Present
Berlin, Germany

- Lead release management and developer experience initiatives at Deel from a people, process, and operational perspective.
- Manage a team of release managers and engineers, drive cross-functional coordination, and shape internal tools and workflows that improve delivery efficiency, release reliability, and organizational execution.

SENOUR BACKEND ENGINEER, *Enpal* 02/2025 – 08/2025
Berlin, Germany

- Delivered scalable, event-driven services using .NET, MongoDB, and Azure.
- Built critical features with a focus on maintainability and performance.
- Contract concluded after probation due to strategic misalignment, despite high delivery and quality.

FREELANCE BACKEND ENGINEER (Contract) 09/2024 – 02/2025
Remote

- Led architecture and delivery of internal tools and data pipelines for early-stage startups.
- All projects completed as scoped; transitioned to seek long-term ownership and product focus.

STAFF ENGINEER, *Join Solutions* 02/2024 – 09/2024
Berlin, Germany

- Refactored application processing logic and introduced permission-based access, increasing application volume by 15%.
- Delivered scalable microservices architecture using gRPC, Docker, and Kubernetes, boosting system performance by 25%.
- Mentored engineers, enforced code review policies, and drove 20% improvement in code quality.
- Led cross-functional releases with 95% on-time delivery rate.
- Optimized database access for critical queries, achieving up to 1000x performance gains.

SENIOR BACKEND SOFTWARE ENGINEER, *Join Solutions* 12/2022 – 01/2024
Berlin, Germany

- Developed scalable and efficient backend services primarily using TypeScript, enhancing system reliability and performance across multiple projects.
- Designed and implemented gRPC APIs for seamless communication between backend systems, improving inter-service communication efficiency by 50%.

- Optimized database queries and implemented performance enhancements, achieving up to 1000x faster query execution for critical database operations, significantly boosting overall system responsiveness.

SENIOR SOFTWARE ENGINEER, *Pixsy* 09/2021 – 12/2022
Berlin, Germany

- Developed image comparison algorithms, significantly improving image match accuracy.
- Automated data analysis workflows, reducing manual overhead by 50%.
- Enforced testing culture, cutting production bugs by 60%.

BACKEND TECHNICAL LEAD, *Sonect* 03/2020 – 08/2021
Zurich, Switzerland

- Delivered white-label fintech solution for BNL and led migration to microservices.
- Migrated infrastructure to bare-metal for performance and cost gains.
- Integrated with EU financial systems and promoted high code quality standards.

BACKEND TECHNICAL LEAD, *BillBeez* 05/2019 – 03/2020
Kyiv, Ukraine

- Launched new fintech platform with scalable Node.js and MySQL microservices.
- Designed secure RESTful APIs and performance-tuned backend processes.

FULLSTACK SOFTWARE ENGINEER, *Thomas Cook* 10/2017 – 05/2019
Kyiv, Ukraine

- Developed web applications using Angular (JavaScript and TypeScript), beside HTML, CSS, and React.
- Designed and implemented RESTful APIs using Node.js and Express.
- Utilized MySQL and MongoDB databases to store and retrieve data.

SOFTWARE ENGINEER (SHORT CONTRACT), *Eze.tech (Consulting agency)* 08/2017 – 10/2017
Kyiv, Ukraine

- Developed and maintained backend systems for e-commerce platform (tickets reseller) with a team of developers.
- Designed and implemented RESTful API services for a web application using Node.js and Express.

SOFTWARE ENGINEER, *Intersog* 04/2017 – 08/2017
Kyiv, Ukraine

- Developed and maintained software solutions for the Prefender project focusing on searching personal data and aligning with GDPR.
- Collaborated with cross-functional teams to design and implement data privacy features in accordance with regulatory requirements.
- Optimized search algorithms and data storage mechanisms to enhance the efficiency of personal data retrieval.

SOFTWARE ENGINEER, *Leantegra* 01/2016 – 04/2017
Kyiv, Ukraine

- Migrated the CVO portal from Angular 1.5 to React, enhancing performance and user experience. Created a real-time location service and analytics platform, improving data accuracy and providing actionable insights.
- Developed and maintained full stack applications using a diverse set of technologies, including:
- Frontend: JavaScript (Vanilla, ES5, ES6), Angular.js (1.x), jQuery, React, Redux, HTML5, CSS3, Bootstrap, SCSS, LESS
- Backend: Node.js, ExpressJS, Sequelize
- Databases: MySQL, PostgreSQL, MongoDB
- Tools and Frameworks: MVC, Mocha, Chai, Gulp, Webpack, Babel
- Designed and implemented REST APIs and developed data visualization features using NVD3.

EDUCATION

B.S. COMPUTER SCIENCE, *National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute" | https://kpi.ua/en/* 09/2017 – 06/2021

M.FIN. FINANCE, *Kyiv National Economic University | https://kneu.edu.ua/en/* 09/2004 – 06/2009

SKILLS

- nodejs
- .NET/C#/Razor
- express
- nextjs
- RPC
- RESTful API Design
- WebSockets
- Middleware Integration
- Unit Testing (Mocha, Chai, Jest)
- CI/CD Pipelines
- SQL and Query Optimization
- NoSQL Data Modeling (MongoDB)
- Cloud Platforms (AWS, GCP, Azure)
- DevOps Practices and Tools (Terraform, Pulumi)
- And many others ...
- TypeScript
- Go
- fastify
- gRPC
- Asynchronous Programming
- GraphQL
- Event-Driven Architecture
- Security Best Practices (OWASP)
- Integration Testing
- Authentication & Authorization (JWT, OAuth)
- PL/pgSQL Programming
- Version Control (Git)
- Container Orchestration (Kubernetes)
- Agile/Scrum Methodologies
